

Central Natural Environment Garden

This area was an old roadbed that has been reclaimed as a community greenspace. Although the land is owned by the City of Thunder Bay, EcoSuperior Environmental Programs has worked with community partners to create this new habitat; a great space to have a picnic, see urban wildlife and learn about native species.

Jardin environnemental naturel de Central

Cet endroit était une vieille plateforme qui a été transformé en un espace vert communautaire. Bien que le terrain appartienne à la ville de Thunder Bay, le programme environnemental d'EcoSuperior a travaillé de concert avec des partenaires communautaires pour créer cet habitat un bel endroit pour y faire un pique-nique, y observer la faune urbaine et en apprendre davantage sur les espèces indigènes.

WHEN I VISITED, THE MOON WAS:

Search around Central Gardens for 5 different metal birds. Can you name the birds? Hint: Check out the trees for this scavenger hunt. See the Activity Page for a silhouette of each bird species.

Clue: Look around the pine grove and you'll find the post!
