

## Kam River Park Parc de la rivière Kaministiquia

This park is 500 metres long and makes up, 1% of the waterfront of Thunder Bay.

Transporting of industrial goods used to cause a lot of pollution but we are improving.

Green spaces like this help contribute to the rehabilitation of land. Rehabilitation means healing the land and restoring, or putting it back, the way we originally found it.

Ce parc a une longueur de 500 mètres et représente 1 % du rivage de Thunder Bay. Le transport de produits industriels a causé beaucoup de pollution, mais nous nous améliorons dans ce domaine. Les espaces verts comme celui-ci contribuent à la réhabilitation des terres. La réhabilitation signifie soigner les terres et les restaurer ou les aider à retrouver leur état d'origine.

post-artwork by Laura K. Preston

WHEN I VISITED, THE MOON WAS:

When we plant trees we are helping to rehabilitate the environment.  
Have you ever helped to plant a tree?  
If you have never helped to plant a tree, try it with a family member.

Clue: Locate the Canadian flag flapping in the wind. From there take 20 paces away from the river to find the post.
