

Prince Arthur's Landing

Embarcadère Prince Arthur Planchodrome

There is a great view of the lake! Lake Superior is the largest freshwater lake, by surface area, in the world! Although seemingly cold, Lake Superior is impacted by the changing climate patterns, otherwise known as climate change. A warming lake can impact the wildlife that use and live by the lake.

Activities that we do daily can impact Lake Superior's climate.

Il y a une vue magnifique sur le lac ! Le lac Supérieur est le plus grand lac d'eau douce en superficie du monde ! Même s'il semble froid, le lac Supérieur est impacté par les tendances changeantes du climat connu sous le nom de changement climatique. Un lac qui se réchauffe a un impact sur la faune qui utilise et vit près du lac.

Nos activités quotidiennes peuvent avoir un impact sur le climat du lac Supérieur.

WHEN I VISITED, THE MOON WAS:

What can you do to slow the changing climate? Do you walk to school? Do you compost? Do you turn off the lights when you aren't using them? Use the chart on the Activity Page to record your actions.

Clue: Locate the arch near the Tai Chi platform, close to the water's edge. With your back facing the water, take the path to the left and walk towards the skate park.
