

## Waverley Park Parc Waverley

It's lovely to be under the shade of these trees on a hot summer day! They do a great job of keeping Thunder Bay cool. Their deep roots also hold water to keep our city from flooding when there is heavy rain. This is the second oldest park in Ontario!

Il fait bon être à l'ombre de ces arbres pendant un jour d'été chaud ! Les arbres permettent à Thunder Bay de rester fraîche. Leurs racines profondes gardent aussi de l'eau pour empêcher notre ville d'être inondée lorsqu'il pleut beaucoup. C'est le deuxième parc le plus ancien en Ontario !

WHEN I VISITED, THE MOON WAS:

We all need to breathe but you couldn't breathe if you didn't have lungs. Where are yours? Do you know that you are standing in the lungs of Thunder Bay right now in this patch of urban forest? Forests are the lungs of the world because they give us oxygen!

**Clue:** The Hogarth Fountain dates all the way back to 1790! Look around it to find the post.
